

Data Analytics for Resource Efficiency

To optimise resources through data analytics to drive efficiencies

Application Development

Bespoke data-driven applications
for your organisations needs

Benefits to Customers

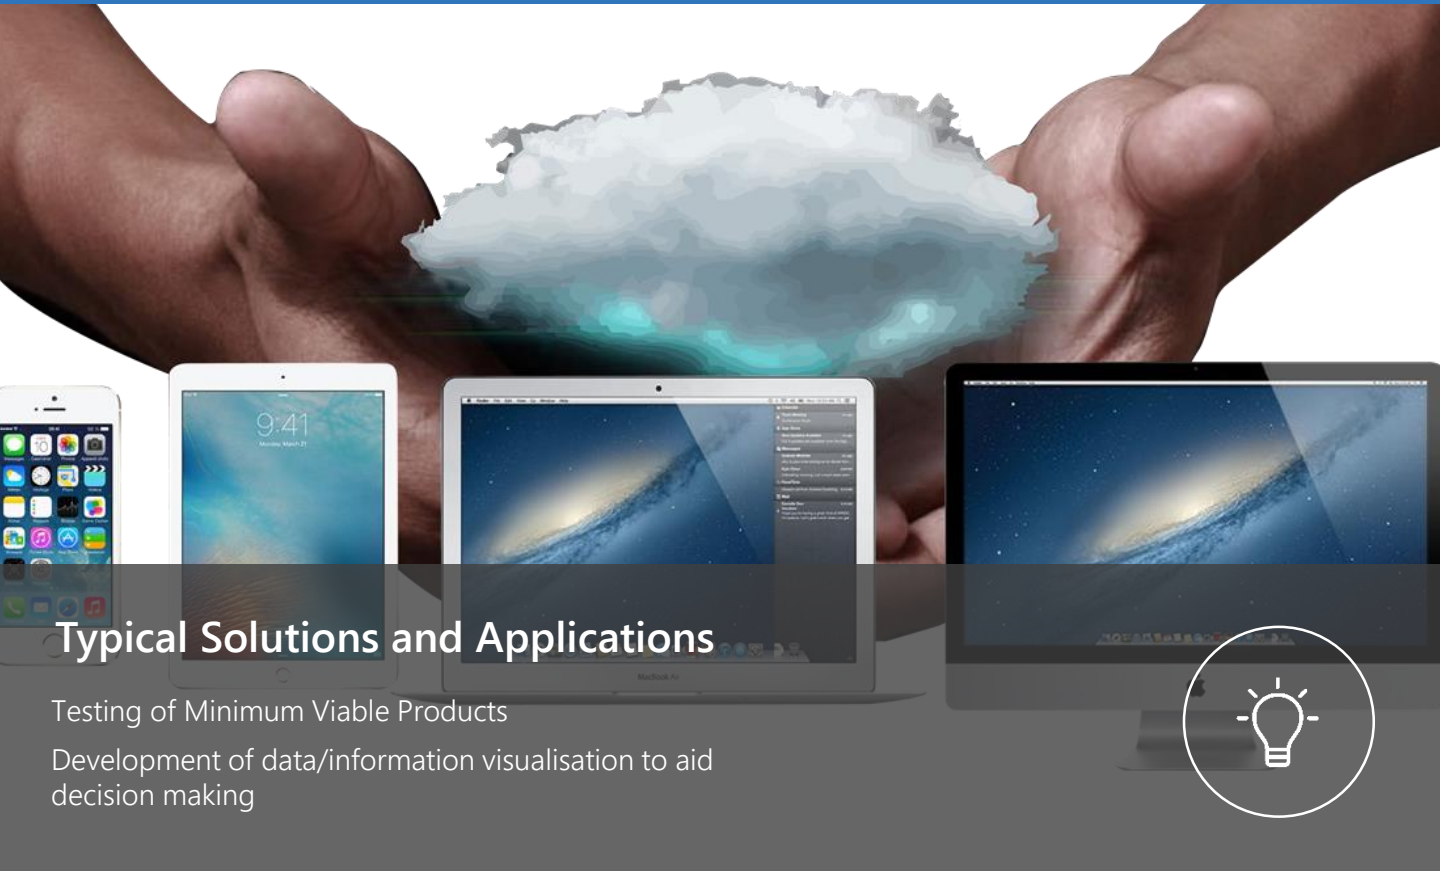

Cloud-based applications for data analytics available anytime, anywhere and on any device

Rich data visualisation and analytics

Industry standard security

Modern, intuitive interfaces

Typical Solutions and Applications

Testing of Minimum Viable Products

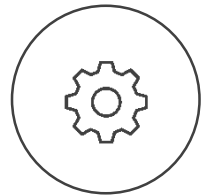

Development of data/information visualisation to aid decision making

Technical Description

Custom web applications built from the ground up. Based on customer specifications the DARE team can design, build and validate cloud based applications for different scenarios, including but not limited to:

- Data intensive apps
- Rich visualisations
- Running algorithms on the cloud to derive information
- Smart notifications to relevant parties
